Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 30, 32, and 34-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshihiro et al (EP 0896337 A2).

Yoshihiro et al discloses an optical disk storage medium that shows all the limitations recited in claims 30, and 35, including the feature of the audio recording area configured to store audio information of one or more tunes or one or more pieces of music in unit of a given track (See Yoshihiro et al's Figure 3), and the feature of the management area with respect to the track of said audio information, the management area including program chain information configured to control a reproduction sequence of said audio information, and said program chain information including information configured to manage said tune or music as specified in the present claim 30. (See Yoshihiro et al's Figure 8a-9).

With regard to claims 32, 34, the feature of the reproducing device specified thereof is present in the cited reference of Yoshihiro et al. (See Yoshihiro et al's Figure 12).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2616

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 31, and 33, are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshihiro et al in view of Official.

Yoshihiro et al discloses an optical disk and optical disk reproducing apparatus that shows substantially the same limitations recited in claims 31, and 33, including the feature of the optical disk having an audio recording area and a management area as specified in the present claims 31, and 33. (See Yoshihiro et al's Figures 3, and 8a-9).

Yoshihiro et al fails to specifically disclose the feature of the recording apparatus for performing information recording on the recording medium as specified in the present claims 31, 33.

Examiner takes Official Notice in that it is notoriously well known in the audio/video recording/reproducing art to have a recording means for the purpose of performing recording of information of a recording medium as claimed.

It would have been obvious to one skilled in the art to modify the Yoshihiro et al's apparatus wherein the reproducing means provided thereof would incorporate the capability of a recording means for the purpose of performing recording of information of a recording medium in the same conventional manner as is notoriously well known in the recording/reproducing art. Examiner has taken Official Notice. The motivation is to be able to record and save provided audio information on the recording medium at any desired time as suggested in the prior art.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ueno et al discloses a conventional optical disk and optical disk recording/reproducing apparatus which includes audio recording area and management area having program chain information.
